

Charging Embedded Li-ion Battery Motor

Required:

Charger with 6ft. Cable
#9025166

Optional:

8* Charger Extension Cable
#9021131

Motor Extension Cables
10* - #9018623
48* - #9016736
96* - #9018624

Be certain you have the correct Somfy plug-in charger for your embedded battery motor.

Estimated battery charge time can be up to 6 hours. Fully charged battery should last for about a year, with an average use of one up, one down, cycle per day.

NOTE

The LED on the motorized shade will blink red when the battery requires charging.

STEP 1

Attach small connector from wall charger to charging port, on the motor head.

STEP 2

Plug charger into electrical outlet. The LED indicator on plug will illuminate RED during charging.

STEP 3

Once LED illuminates GREEN, battery is fully charged. Disconnect the charger connector from motor's charging port, then remove wall charger from electrical outlet.

Observation	Possible Causes	Solution
Window covering does not move	Battery is low	Recharge battery
Motor LED blinks RED when window covering is operated		
Charger LED is RED		
Charger LED is GREEN	Battery is fully charged	Unplug battery from charger

NOTE:

The shade can be used as usual while the battery is charging.

Using charger extension cables can facilitate access to charge motors installed in high windows.

WARNING

- Improper use can lead to overheating, fire, or explosion, possibly causing injury or death.
- Only use correct Somfy plug-in charger for your embedded battery (#9025166).
- Explosion risk if embedded battery is damaged, exposed to heat, or low air pressure.
- Do not recharge the battery during routine maintenance work (e. g. cleaning windows).
- Do not damage embedded battery motors (drop, alter or forcibly open), expose to high temperatures ($\geq 140^{\circ}\text{F}$ or 60°C), flame, or moisture.
- Product intended for indoor use only.
- Keep out of the reach of children.
- Damaged products should be properly discarded or recycled.
- Intended use with Somfy embedded li-ion battery motors only (refer to the motor instructions for programming).
- Use only Somfy recommended replacement parts.
