Use this checklist (system requirements) to ensure TaHoma® switch will perform as designed

Prerequisites:

Place TaHoma switch at least 5 feet from any Wi-Fi routers or access points

A wireless router running a 2.4 GHz network with open and mixed mode encryption
- Supported security: WEP/WPA/WPA2-personal

Dedicated 110V outlet
Note: Do not plug USB directly into a compatible device, must be directly connected to AC via provided power supply.

Wi-Fi Network Name (SSID) and Password
Note: Internet is needed for setup and usage.

Environmental considerations for optimal performance

Prerequisites:

Hub must be placed in central location to ensure signal strength in a home

The motor antenna must be accessible

Add Zigbee repeating devices to strengthen the mesh network

Do *not* place the hub near a metallic surface and/or inside a duct containing electric cables

Do *not* use hub in areas where devices using radio frequency transmission are prohibited

Do not place the TaHoma switch near devices which could be affected by radio waves:
- Fish Tanks (Aquariums)
- Cordless Phones
- Microwaves
- Baby Monitors
- Refrigerators
